EDUCATION

Bachelors of Science in Computer Science   **Sep 2020 - June 2024**
National University of Modern Languages (NUML)

COURSE WORK

- Data Structures and Algorithm
- Database Management
- Object Oriented Programming
- Artificial Intelligence

WORK EXPERIENCE

Markalytics   **July 2024 - Present**
Mobile App Developer | Java | Flutter | Kotlin | Rest APi's

- **Expertise in State Management and UI Design:** Utilizing Redux, Redux Toolkit, and RTK Queries to manage complex application states and asynchronous data fetching efficiently, while applying Material UI and Tailwind CSS to craft visually appealing and highly responsive interfaces.
- **Innovative Project Leadership:** Leading the development of scalable web applications by integrating React and Next.js with advanced state management and styling solutions, ensuring high performance, maintainability, and a superior user experience.

Disruptive AI   **June 2023 - May 2024**
Mobile App Developer Intern | Flutter | Firebase

- **Optimized Application Performance:** Integrated state management using Redux and Redux Toolkit with React and Next.js, enhancing application efficiency and responsiveness. Employed RTK Queries to streamline data fetching and management processes.
- **Enhanced User Interface Design:** Applied Material UI and Tailwind CSS to create visually appealing and responsive interfaces, driving innovation and improving user experience in web development projects.

PROJECTS

Portfolio Website | Next.js, Tailwind CSS

- I developed a responsive Portfolio Website using Next.js and Tailwind CSS, showcasing my skills in modern web development with a sleek design and smooth user experience.
- **Live Link:** https://hira-tanveer-portfolio.vercel.app

Quran for Life | Flutter | Firebase

- Developed a comprehensive Islamic app offering Quran recitation, tafsir, translations, prayer times, and tools for memorization and offline access.
- Utilized Flutter with GetX state management, Firebase for backend integration, and multiple REST APIs for data fetching.

Backify | Java | Firebase

- Developed an AI-powered photo background remover app, allowing users to automatically erase and change backgrounds, remove watermarks, and add custom backgrounds with ease.
- Hands-on experience in developing the user interface using React, Redux and RTK Queries.

SKILLS

- **FRONT END DEVELOPMENT: Java | Flutter | Kotlin | Jet Pack Compose**
- **BACK END DEVELOPMENT: Firebase | Mongo Db | MY SQL |**
- **REST API's : Flask | Third Party Api's**
- **TECHNICAL SKILLS: C++ | Python**
- **VERSION CONTROL: Git | GitHub**
- **SOFT SKILLS: Collaborative | Efficient | Leadership | Environment Responsive | Motivated**
